

# tem... delivering extraordinary benefits!

Can a 50:50 decision be unanimous?

Waste stretch tape from 50 pallets

Waste stretch film from 50 pallets

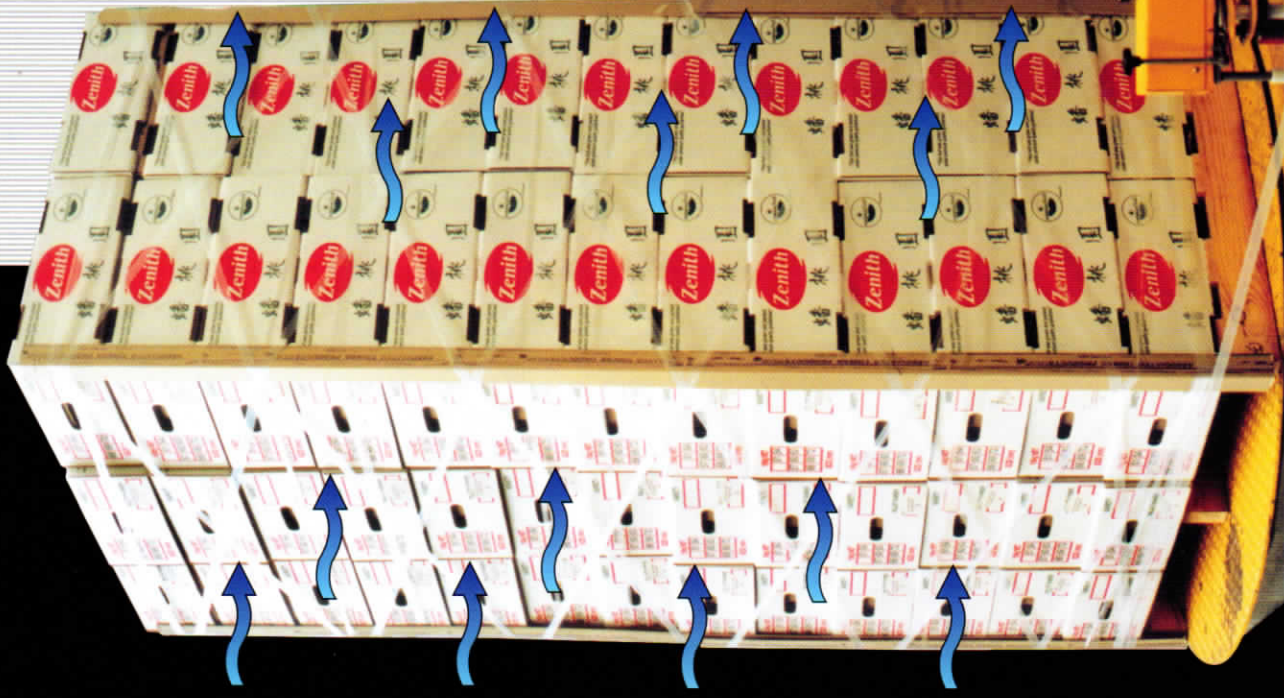

**Choosing any other system would be a waste**

## 95% Waste Reduction With 3M Stretchable Tape

- The unique properties of the patented 3M tape allow 95% or more waste reduction by volume versus stretch film or netting. Plus the 3M Stretch Tape is recyclable.
- The best way to reduce waste is to eliminate it at source and this is exactly what the use of 3M stretchable tape achieves. Only a handful of tape is needed to achieve complete load stability.
- Dramatically reduced waste, slashes your handling and disposal costs

## Flow Through Ventilation Protects Perishable Products

- Total air flow prolongs the shelf life of fruit and vegetable products
- Avoids damage to packaging caused by "sweating" inside plastic film wrap
- Saves days of production time for products that require cooling eg. dairy foods and sauces
- Easy to apply using Safetech Stretch Tape Wrapper
- Removal of tape is simple and waste is negligible

# Stretch Tape Wrapper

## Specifications

### Load Size:

- Accepts Pallets up to 1400mm square
- Maximum load weight: 2000kg

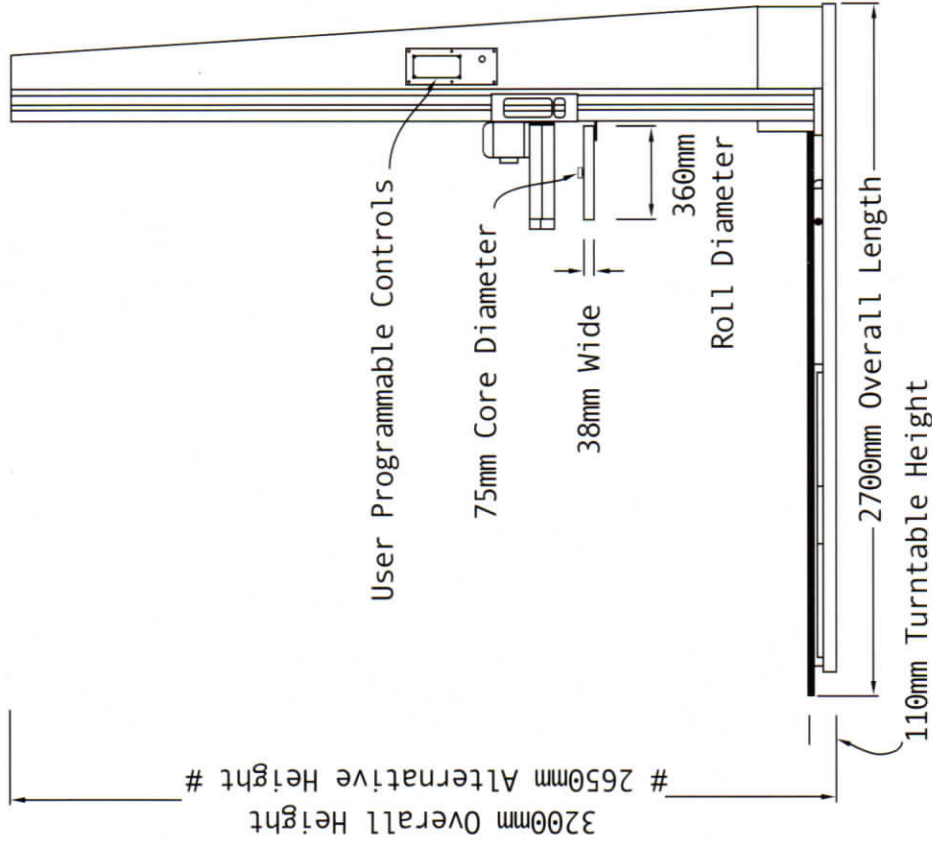

### Wrapping Patterns:

- Wraps 2 Cross to 10 Cross Multi X, or 1 Layer to 10 Layer Banding Patterns
- Up to 9 Multi-X and 9 Banding Patterns can be preset

Accepts **3M** Stretchable Tape Rolls

Shipping Weight: Approx 500kg

Power Supply: 240V 50Hz Single Phase
